CLEANCARE GUIDE

Professional cleani

Just one look at the Cleancare model range will tell you that it is different... different in design, different in concept and different in execution; whilst at the same time incorporating a wealth of technology and innovation, both old and new, that will confirm again and again that it is these very differences that are so vitally important to us all.

ng at it's very best...

AutoSave

Energy conservation is vital worldwide, not just to redress the effects of global warming, but also to address the serious shortfall in power generation.

The AutoSave system is unique (patent applied for) and provides for a simple, effective and common sense approach towards achieving savings of up to 50% on energy consumption. The cost saving, the energy conservation and the benefits in terms of extended product life are all seriously meaningful, totally without compromise and absolutely free!

It cost nothing to save energy the AutoSave way. We have designed this technology into our products to allow you, the customer, to embrace and benefit from our own commitment to a greener tomorrow.

Let's save energy... together.

NuSave... You Sa

The NST-220 is an absolute treasure, providing the total convenience of one or two lift-off storage pails allowing the user to keep essential cloths, sprays, etc on board; thus allowing additional 'good housekeeping' to become part of the routine daily cleaning programme.

A range of four models, in three different styles, all benefitting from our new NST sound reduction and AutoSave energy conservation technology.

The EcoTwin, long-life, two-stage motor turbine, together with our high efficiency suction system, plays an important part in raising the Eco performance levels; whilst the HepaFlo filtration concept ensures the highest operational standards combined with clean and convenient emptying.

NSR-200A

ve... We All Save!

NSP-180A NSP-200A

One or two lift-off storage pails NST-220

Convenient Wand Parking NST-220

All three of the styles have their own individual merits but need to be considered carefully when taking into account the cleaning regime, distances involved on a daily or weekly basis, building to building, up and down stairways or long corridors - all must play a part in the decision making process.

The AutoSave system automatically starts in the energy conservation mode; immediately reducing your power to our optimized 500 Watt level.

If, at any time, more performance is needed, one push of the Hi switch gives you 60% more power. A further push of the switch puts you back to economy again. This is truly green technology at its best and in your control.

Less energy, lower noise, longer life and user convenience...
NuSave - the way forward.

Clever Cable Tidy System

Data... Data... Data... Data... Data...

Model	Motor	Power	Airflow	Suction Hi	Suction Lo	Capacity	Range	Weight	Dimensions
NSP-180A	800/500W	230V AC 50/60Hz	30 L/sec Max	2000mm	1300mm	8L	26.8m	5.8Kg	340 x 340 x 340mm

ProSave... ProS

The three model contractor's range all incorporate common design features but vary in capacity in order to provide for contracts and areas of differing size.

All models in the blue range incorporate our high performance TwinFlo, two-stage vacuum motor turbine linked to our AutoSave energy conservation system, allowing the machine to operate automatically at the 600W Eco setting or, equally, at the 1200W high performance standard as required.

PSP-180A

PSP-200A

All ProSave models incorporate our unique cable tidy and plugged mains cable system, extending cable life, adding user convenience and allowing for simple "unqualified" cable replacements.

The power-head design incorporates our new NST sound reduction system which, together with the 600W Eco setting, provides substantially lower noise levels.

All ProSaves use our HepaFlo high efficiency filter bags which substantially enhance performance and provide for quick, convenient and clean emptying when full.

ProVac... Profes

The ProVac range is a perfect example of combining the very best innovation into a single product range to produce exceptional results in many more ways than one could imagine.

The enhanced power and performance from our TwinFlo vacuum technology are fully complemented by a combination of our new NST sound reduction and AutoSave energy conservation systems.

HepaFlo filtration not only raises performance standards but provides for clean and convenient emptying when full.

Both of the design concepts have their own individual merits but need to be considered carefully when taking into account the cleaning regime, distances involved on a daily or weekly basis, building to building, up and down stairways or long corridors - all must play a part in the decision making process.

PVT-220A

PVR-200A

sional Vacuums.

The PVT-220 and PVT-390 models are a serious departure from the normal vacuum cleaner design, providing ease of handling and the total convenience of one or two lift-off storage pails; allowing the user to keep all essential cloths, sprays, sponges, etc on board; thus allowing additional 'good housekeeping' to become part of the routine daily cleaning programme.

HepaFlo' Filtration...

Hepaflo' Dust Bags

All Cleancare machines use our high efficiency, giant HepaFlo' dust bags ensuring excellent performance and clean and simple emptying.

1 NVM-1CH (604015)

Fits all 180 and 200 and 220 models.

2 NVM-2BH (604016)

Fits all 370 and 390 models.

Don't Forget - Options

All of our individual machines are supplied with comprehensive accessory kits for the size and type of cleaning and its typical application.

The comprehensive optional accessory range is, however, enormous and covers specialized accessories for almost every requirement. Should additional tasks demand additional accessories or attachments, just ask.

The better and more complete the product specification to suit your needs, the better will be the cleaning results. A few examples

1 *AiroBrush. Extra quick and efficient carpet care (290mm)*

2 *Hard Floor Brush. Very efficient and effective on extensive hard floor surfaces (300mm).*

3 *Optional extra 5L Swing Caddy for NST/PVT models. Available in 4 colours - Red, Blue, Green and Yellow.*

4 *Rubber Accessories. A range of specialized soft touch accessories for computer keyboards, etc.*

5 *High Level Aluminium Extensions. The easy way to clean many of those out of reach places (1220mm).*

Just a Few - Ask for the Full Accessory Catalogue...

Cleancare Accessory Kits

All our Accessory Kits are to full professional standards, are comprehensive, made to work and made to last.

Kit AE1 - NSR200/NST220 Stainless steel, long-life kit.

NVA-601101	2.4m Nuflex Threaded Hose
